Hi Kris,

Attached are our draft reviews of open literature studies that we've identified as containing aquatic invertebrate toxicity data for these two actives. This review is on-going and is by no means finalized, but they have undergone a secondary peer review. These are based on the results of two large-scale literature searches done; one by the Health Canada library in summer 2016 and another recently given to us by the Task Force on Systemic Pesticides (both are also attached as Excel files). If you come across any studies not in our list we'd be very happy to hear from you too.

Regards,
JD

Hi Kris-

Our evaluator for the clothianidin and thiamethoxam aquatic invertebrate reviews (JD Whall) is preparing a reference list for you.

He will send to you once he has it pulled together.

Thanks,

Connie

Hi Connie,

Sure, I can put together a list of studies from the open literature that we've reviewed for additional toxicity endpoints.

JD

Hi JD-

Do you have the list of studies that we will be reviewing for the SR that could be shared with EPA?

See inquiry below from Kris Garber at EPA.

Thanks-
Connie

Hi Connie,

I hope all is well with you. We are still chugging along down here at EPA.

When you were here in Virginia, you mentioned that folks in your shop were busy reviewing aquatic toxicity studies for clothianidin and thiamethoxam. We are just now starting to look through the studies in the literature. Would you be willing to send me a list of citations that you are reviewing for these chemicals? I am interested in cross walking your list with ours to see what we may be missing.

I can send you our ECOTOX database run if you are interested.

Thanks,

Kris
